

## The Process of Hydrodistillation

Liquid Sense, the fragrances that make sense are created by Bioponic Nutraceuticals using advanced hydro distillation apparatus and proprietary protocols for the preparation of the ingredients.

We start with the finest natural herbs, fruits and flowers lavender, lilikoi fruit, jasmine, blueberry, rose, pineapple, lemon grass, tuberose, spearmint, lime, chamomile & sandal wood and add pure water naturally filtered through ancient volcanic rock. Gently heating the mixture releases a vaporous steam that carries the plants unique molecular structure to condense and collect as the hydrosol essence. There are no synthetic preservatives used, only natural herbs and pure water.

Our production facilities use only the finest laboratory glass distillation equipment, which gives our hydrosols their purity and distinct quality.

Experience the exotic aromatic fragrances of Liquid Sense.

# Liquid Sense™

Liquid Sense fruit, floral and herbal mists are a rare treat for the senses ... a way to experience tropical paradise with each spray.

Liquid Sense is the pure fragrant essence of each flower, herb or fruit, naturally created, using no preservatives, additives or artificial chemical substitutes. Each spray of Liquid Sense carries the soul of the plant essence in a delicious aerosol mist, which refreshes the skin, reduces stress, relaxes the mind, calms the emotions, soothes the body, creates balance & promotes well being. As a natural air freshener, an aromatherapy scent or even a subtle perfume, Liquid Sense is unsurpassed.
